Welcome to Environmental Studies (ENVS)!
ENVS is an excellent complement to any major and can enhance your career opportunities. The goal is to broaden your perspective, while allowing you to follow your interests. In fact, the possibilities to widen your knowledge base are nearly endless. Gain new skills in environmental analysis and understand key issues at the local, regional, national, and global scales. This minor helps unify the many themes within environmental studies, while creating individual paths for student success.

ENVS is built around one core course, three topic courses (Environment, Society, Skills), and one unifying final course.

1. **CORE COURSE:** GEOG 300i – Geography, People and the Environment

2. **TOPIC COURSES** – (take one from each topic)

   **Topic 1 – Environment**
   - BIOL 307 Principles of Ecology
   - FOR 201 Ecology: North American Forests
   - GEOG 104 Weather, Climate, and Society
   - GEOG 303i Physical Geography
   - GEOG 330 Physical Climatology
   - GEOG 111/112 Environmental Geology
   - GEO 220 Dynamic Earth
   - GEO 221 Earth through Time
   - HORT 238 Home Gardening
   - HORT 328A Landscape Design
   - HORT 469 Organic Gardening
   - PLB 200 General Plant Biology
   - PLB 301i Environmental Issues
   - ZOOL 312i Conservation Natl Resources

   **Topic 2 – Society**
   - ANTH 370 Contemp Human Problems
   - ANTH 410K Ecological Anthropology
   - CMST 412 Environmental Rhetoric
   - FOR 285 Social Influences in Policy
   - FOR 325 Forest Admin & Policy
   - GEOG 100 Environmental Conservation
   - GEOG 103 World Geography
   - GEOG 320 Environmental Sustainability
   - HIST 457 American Env History
   - MGMT 474 Management in Society
   - PH 488 Environmental Health
   - PHIL 307i Science Nature Technology
   - PHIL 435 Environmental Philosophy
   - SOC 386 Environmental Sociology
